- Complaint resolution
- Mess management
- Asset tracking
- Student welfare monitoring

Note: Bodhi Learn's platform is designed to be modular, allowing institutions to activate and configure features based on their specific needs and subscription tier. The platform provides seamless integration between traditional educational management needs and modern digital solutions, ensuring a smooth transition from conventional methods to digital operations. Features can be activated based on institution needs and subscription tiers.

🤖 Future Roadmap Features:

- AI-powered admission prediction
- Automated timetable optimization
- Predictive maintenance for resources
- Advanced alumni engagement tools
- Enhanced parent engagement features
- Integrated career guidance system
- Smart campus management
- Blockchain-based certificate verification
- Smart campus integration
- Advanced analytics
- VR/AR learning environments
- IoT integration
- Career guidance system
- Alumni engagement platform
